

**AMENDMENT TO THE CLAIMS**

1-17. (Cancelled)

18. (Previously presented) A method, comprising:

receiving an image from an image capture device, in which the image capture device generates an image of an area in which human activity is desired to be substantially nonexistent;

determining information related to the area;

receiving a request for a first user to monitor;

receiving a user identifier;

verifying that the user identifier corresponds to the first user;

providing the first user with the image;

receiving a response to the image by the first user, in which the response is one of: an indication that a human is present in the image, an indication that no human is present in the image, and an indication of uncertainty whether a human is present in the image;

providing additional users with the image;

receiving responses to the image by the additional users;

evaluating the received responses;

determining, based on the information related to the area, an entity to notify; and notifying the entity.

19-60. (Cancelled)

61. (Previously presented) A method, comprising:

receiving an image of an object from an image capture device situated in a particular area;

routing the image of the object to a plurality of remote viewers;

requesting that each remote viewer of the plurality of remote viewers provide an indication of whether the image of the object matches a reference image of a particular object; and

receiving, from each remote viewer of the plurality of remote viewers, the indication of whether the image of the object matches the reference image of the particular object.

62-75. (Cancelled)
